

LEAF SPRINGS

Steel

With OEM Supply North American made steel mono, 2 leaf-air, 3 leaf and 8 leaf springs, we have the range to suit most trailer applications. Some popular models listed overleaf. We also have different configurations of Heavy Truck spring packs for the brands we support, and many other all make applications.

Composite

With weight savings of around 60% over conventional steel 3 leaf springs, Liteflex monoleaf composite springs can make a real difference to payload and fuel economy. The spring construction naturally withstands corrosion, is more durable than steel, and is not subject to the catastrophic failure seen in steel.

Part Number 21607-01 (Reyco)

Part Number 16316-01 (Hutchens)
