

TRACTIONAIR G1, G2 & G3

STANDARD TANDEM DRIVE TRUCK LAYOUT

- TractionAir uses Air Brake Yellow Nylon to avoid onfussion with other air lines.
All lines $\frac{1}{2}$ " except Tee Block to Tyres $\frac{3}{8}$ "
- Truck Air brake systems normally contain a little sludge and oil residue.
The TractionAir additional Air Tank helps trap this. Undo the drain cock regularly to clean.

*Note: Drawing is of suggested layout.
Fit to suit truck following plumbing route.*
