UPDATE FROM GAVIN

As new and used truck sales rebound to pre COVID levels, especially in light commercial, it is pleasing to see transport industry is recovering steadily. As a result, TRT Transport, Parts and Service continues to strengthen.

While uncertainty remains in relation to the future start of the promised "Shovel Ready" projects, the sales of assets like trailers and cranes are expected to take longer to recover. As NZ heads to the polls in September, there are some large policies for the heavy transport sector being promised from most major parties. This election is a real chance to improve opportunities for our industry.

TRT Trailers are recovering well with an increase in forward orders, especially in Australia where there is more buoyancy on large scale infrastructure and mining projects, in QLD and NSW, getting underway.

TRT Christchurch has also enjoyed a strong recovery with volumes returning faster across the South Island than other regions. While not quite at the same level of our Christchurch the Auckland team have also had a strong come back with many of their clients still in COF catch up mode, post lock down.

I am also pleased to announce the appointment of Stephen Forster as Hamilton Sales Manager for Transport Parts. Stephen has wide range of experience in the heavy commercial transport sector and he will be a great asset to our Hamilton parts team. Stephen starts on the 10th of August.

TRT's core products continue to be in high demand, including seats, drivetrain and brakes. So, we have put together some great specials and packages this month to keep you moving.

While COVID-19 has affected many companies, including TRT, we are prepared for the road ahead. Although it will have its challenges, we look forward to working closer than ever with our customers to deliver the TRT standard of service that you have come to trust over the last 53 years.

National Sales Manager,
Gavin Halley

IN THE NEWS

TRT Transforms PGF Transport Kenworth in Fit Out

PGF Transport, based in the heart of King Country, required an in-depth fit out of their 2008 T404S Kenworth and the TRT team delivered great results.

The upgrade involved replacing the AS2 automatic transmission with a RTLO-20918B manual transmission. This called for the transmission to be completely replaced, the clutch and controls to be changed to the manual version, as well as gear level installation and associated parts. The engine computer was reprogrammed to take the manual transmission. The dash display was also converted to the manual version.

Additionally, the truck was given a general spruce up. This included new guards and mud flaps. TRT smartened up their Kenworth cab and improved driver comfort with a new KAB 554B Kenworth seat and new carpet.

TRT and their Queensland-based subsidiary, TRT (Aust) Pty Ltd, are the new KOBELCO Crane distributors, covering KOBELCO-branded cranes in New Zealand, Australia, Papua New Guinea, New Caledonia and Fiji, providing KOBELCO crane customers with technical information, parts supply, and sales of new KOBELCO cranes.

This new partnership reflects both organisations commitment to outstanding customer service and support throughout

the region. This combines TRT's great customer support and expertise with KOBELCO cranes, with a reputation as the most "reliable brand of crawler cranes on the market".

TRT have built up many decades of expertise in the crane industry and are highly respected and well experienced with crawler cranes, including KOBELCO. This new partnership will reshape the way customers are supported moving forward.

PARTS SUPPORT - WHEN YOU NEED US

Reps & Product Managers

Our 10 sales reps for Parts and Hiab and 5 product managers for Traction Air, Seating, Hiab, Cranes and Trailers are here to help.

Enquiries & Ordering

If you need to pick up a part, place an order, speak with one of our experts or just drop in to check availability, we will get you back on the road faster.

GEAR TALK

FIND THE RIGHT SEAT FOR THE JOB

Your Health and Well Being is Important

Selecting the right seat is an investment in operator health and well being. There are significant benefits that include:

- Body support and posture improvement
- Operator comfort over long hours
- Suspension to protect from jarring movements
- Reduced Fatigue

Reducing fatigue symptoms prevents incidents, accidents and injuries, like backs, that can be costly. The right seat is an investment in productivity

We can help find the right seat for you, tell us the following:

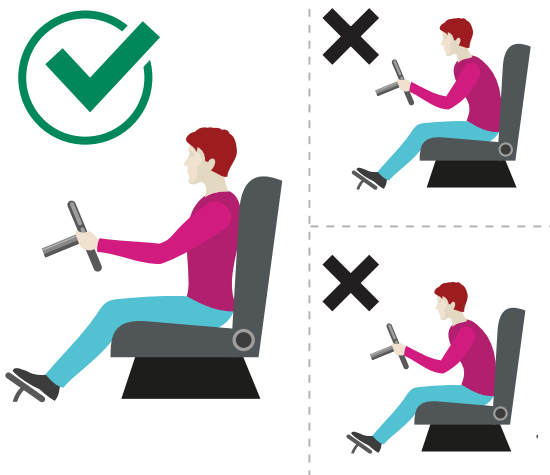

1. What type of work are you are doing.
2. Year, Make and Model of your vehicle and existing seat - we can find the right replacement and the right certified adaptor plate for install
3. Air or mechanical Suspension?
4. Seat belt integrated?
5. Armrests required?
6. What mounting is required e.g. side rails.

Choosing the right seat

This can be hard. There are different seats for different truck tares, makes and models and there are a number of great quality options, but be aware, there are some very poor counterfeit options out there too. Seats are also designed for certain operations - and even operators.

What you need to look for:

- Adjustable back rest that follows the shape of your spine
- The ability to adjust the height of the seat so your feet are flat on the floor
- Arm rests are close to the body so shoulders can relax

ACC support safe seats that get drivers back to work!

At TRT, we receive regular enquiries from ACC requesting seat options for injured drivers to return to work. By providing an individualised solution, specific to the vehicle and operator, we are able to get the person back working sooner. This is an excellent solution for the health and wellbeing of the operator who can safely and confidently get back behind the wheel.

TRT provide the complete solution, we analyse the vehicle, its operating environment and operator requirements to ensure we supply the best fit to the end user.

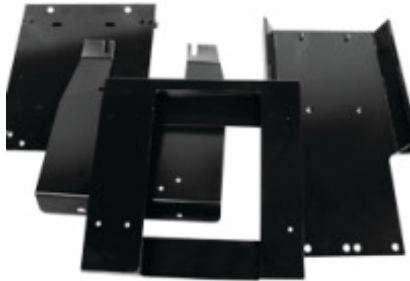

Features of these seats include armrests, custom side bolsters and increased suspension travel. We can modify seats to suit your application and injury.

SOLUTIONS FOR EVERY TASK

Prices shown exclude GST & freight and are valid from 1st August 2020 to 30th September 2020 or while stocks last.

SEAT ADAPTOR PLATES

It's critical to have a certified adaptor plate to fit a seat. Our wide range of pre-certified adaptor plates allows your new seat to bolt in with no further certification required!

SEAT COVERS

Customise your truck, machinery or ute seat covers with your company logo and protect your seat for longer!

No set-up fee with purchase of 10 or more!

SAFETY ALERT

NZTA issued a Warning in Nov 2019 on counterfeit seatbelt extenders. Only tested and verified extenders can be used. TRT supplies the already compliant APVS range of extenders – Usure if yours is safe. Talk to our experts first!
