# UPDATE FROM BRUCE

# TRT PARTS

I hope you all are managing well with your operations. It has been an interesting period for us all as COVID continues to disrupt how we are all able to operate, along with the routines of our teams and their families.

TRT was fortunate to be able to work through under our Essential Service Support status and the team did a great job. We are now back to full capacity and here to support all your needs.

On the 10th of September 2021, TRT unveiled a brand refresh, including a new-look logo and tagline. "TRT, for the long haul" is replaced by "TRT, Made Possible", a reflection of the innovation developed in the transport and infrastructure sectors in Australia and New Zealand, since 1967. This change is visible across branches and online platforms used by TRT.

At the heart of our rebranding is our potential to problem solve. The new bold logo and the "Made Possible" promise are rooted in the company's values and commitment to finding solutions to solve problems for our customers.

TRT's innovative focus is undeniable. Our story is driven by our competitive refusal to be beaten by the unsolvable. However, no solution to challenging problems is ever easy, but easy isn't the reason we wake up and do what we do every day. It's a key ingredient to our success and we are taking this opportunity to evolve our brand to better communicate what we represent. There are moments in a business when the time is right to reevaluate your trajectory and plan for growth. Now is that time for TRT. Our future-focused plan means embracing changes and continuously improving to make things possible.

Enjoy the latest edition of In Gear, again packed with great offers and information. Check out the great deals provided exclusively to TRT from our partner Stemco.

Continue to stay safe and reach out if we can support your operation in any way.

Innovation & Sales Group  
Director, Bruce Carden

# IN THE NEWS

## TRT BRAND REFRESH

### NEW LOOK. SAME DEDICATION TO CUSTOMER SOLUTIONS.

Early in September 2021, we announced our brand refresh, including a new-look logo and tagline. “TRT, Made Possible”, replacing “TRT, for the long haul”. This brand refresh is a reflection of the innovation developed in the transport and infrastructure sectors in Australia and New Zealand, since 1967. This change is visible across branches and online platforms used by TRT.

Bruce Carden, TRT’s Director of Sales and Innovation explains, “At the heart of our rebranding is our potential to problem solve. The new bold logo and the “Made Possible” promise are rooted in the company’s values and commitment to finding solutions to solve problems for customers. TRT’s innovative focus is undeniable. Our story is driven from our competitive refusal to be beaten by the unsolvable.”

Robert Carden, TRT’s Technical Director adds, “No solution to challenging problems is ever easy, but easy isn’t the reason we wake up and do what we do every day. It’s a key ingredient to our success to date and we are taking this opportunity to evolve our brand to better communicate what we represent.”

He continues, “We have always put people first at TRT. We aim to provide an environment that allows people to reach their potential and to make things possible, for our customers.”

TRT has a long history of overcoming complex engineering problems. Examples include the TIDD Pick and Carry Crane,

ESS Heavy Transport Trailers, OEM distribution agreements, and its extensive parts support network.

Dave Carden founded TRT in 1967 and it’s his legacy we’ve tried to build on over the years and now the brand refresh better represents that. Bruce Carden continues, “The brand statement “for the long haul” was built on commitment, design excellence, and trust – that’s what’s kept TRT in business for more than 54 years and we will continue to focus on our relationships with customers and fit for purpose, bumper to bumper solutions, that are made to last.”

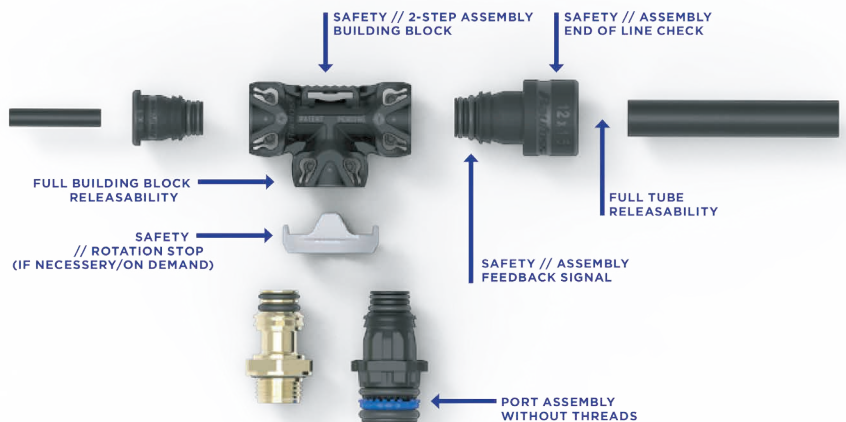

“TRT have four very specific team values that will focus our efforts for customers - Outthink, Outserve, Own It, and Open Minds. TRT’s future-focused plan means embracing changes, and continuously improving to make things possible.”

“There are moments in a business when the time is right to reevaluate your trajectory, and plan for growth. For TRT, now is that time.” He concludes.

# SEAT REPAIR + INSTALL SERVICES

## SEAT REPAIRS

You don't always need to replace your seat with a new one. We provide a complete seat repair service from minor trim and foam repairs to full refurbishments. We only use genuine replacement parts and stand behind our workmanship offering a 12-month warranty.

## SEAT COVERS

Customise your truck, machinery or ute seat covers with your company logo and protect your seat for longer!

No set-up fee with purchase of 10 or more!

## INSTALLATION

Our experienced teams can install your seat at our workshops in Hamilton, Auckland, Christchurch or our mobile service can come to your site.

With our certified adaptor plates, installation of your new seat from TRT in your repair workshop is simple.

Forestry, harvesting, spreading, tankers, stock trucks, access equipment and ag work - if your fleet travels off-highway for any reason, Traction Air CTI can improve your performance.

- Improve traction
- Reduce tyre wear
- Reduce damage to road surfaces
- Greater fuel efficiency
- Improve vehicle and driver safety

Match tyre pressure to load and road surfaces, all from the comfort of the cab!

**MANAGING TYRE PRESSURE HAS NEVER BEEN EASIER, MORE ACCURATE OR SMARTER!**

# INSTALLATION

## Te Pari Products

Te Pari Product's new Scania 650HP V8 has a new HIAB X HiDuo 258-6 Crane supplied by TRT and installed by C&C Engineering.

Te Pari Products is a livestock handling solutions manufacturer based in Oamaru. Their trucks regularly travel the length of New Zealand, and offering a south-bound freight service. The new HIAB X HiDuo 258-6 is a 23tm mid-range HIAB crane. It's a reliable workhorse, ideal for cargo management, making loading and unloading easy and safe. The HiDuo remote control ensures a responsive and safe operation that keep the load stable and boost capacity when their operators need it the most.
